HydPro – Quality politics

HydPro aims to be the preferred design and productions supplier of hydraulic and mechanical equipment to subsea system suppliers, aquaculture, offshore and marine suppliers.

HydPro will be renowned for its highly qualified employees as well as our ability to be solution oriented for the benefit of our customers.

HydPro's production will be efficient to ensure high quality products and services at a low price for our customers, whilst still ensuring our financial security.

Everyone at HydPro will always act in compliance with our regulatory requirements.

We will achieve this by:

- Managing our work processes to reach our goals, comply with the government requirements and fulfill our customers' expectations
- Making sure our employees have the correct and high competence, and stimulate learning and competence development
- Continuously improve the effect of our management systems, our efficiency and profitability in our internal processes
- Integrating risk management as a part of our business to avoid unwanted events and to exploit opportunities
